Dear Ms. Ball,

Shropshire Council Environmental Maintenance Grant 2017

Thank you for your application for a Shropshire Council Environmental Maintenance Grant (EMG). All of the applications we received have been assessed and verified by a panel of officers from Highways and Community Enablement teams.

The total of all the applications (minus some deductions for non-eligible costs) was £196,063.00, considerably more than the allocated budget for the programme of £110,000.00. As a result we have allocated each eligible application a proportion – 56% of its value. This will ensure the widest distribution of the limited budget and the inclusion of as many local council's as possible.

West Felton has been awarded £1,672.22 which is subject to your acceptance and will be paid into your bank account within the next month.

As previously communicated, please note that the EMG programme is under review, which could result in its criteria and methodology significantly changing or the programme ceasing. Please do bear this in mind when planning your Council's future finances and we will keep Town and Parish Council's updated on the outcome of the review.

Your Council's EMG is being awarded to enable it to enhance and maintain your local environment in the most local and cost effective way possible. A copy of the grant conditions is attached with this letter – please do familiarise yourself with these before signing and returning the acceptance form.

Thank you again for applying to the EMG programme. The Highways and Transport/Community Enablement teams are delighted to be supporting this initiative.

Yours sincerely,

Steve Brown
